

HANNA HB 6519

Dear Citizens and Representatives Of,

I write today to urge you to stand for transparency. Foothills of evidence is leading us to the mountain of what is travailing our health, and the trail leads back to the seed of origin of our food. For the sake of the health of you, me, our children and grandchildren, I appeal to you to make this tiny step forward and return the basic right to life. Please support labeling GMO foods for CT citizens.
